AP Webhosting <webmaster@ap.be>

Aan:

Beste student,

Dit zijn de gegevens van de webhosting die voor jou werd aangemaakt. Je zal tijdens een les verdere praktische instructies krijgen over het gebruik van deze webhosting

URL: <http://.gpro.apstudent.be>
Loginpagina: <http://cpanel..gpro.apstudent.be>

Gebruikersnaam: ..

Paswoord: in te stellen via de loginpagina

FTP server: srv-dmz-234.alpaca.int

Protocol: SFTP

Port: 22

wachtwoord wijzigen

loginpagina: wachtwoord wijzigen (1/4)

The image displays two side-by-side screenshots of a cPanel login interface. Both screenshots feature the cPanel logo at the top.

Left Screenshot (Initial State):

- Gebruikersnaam:** Input field placeholder: "Voer uw gebruikersnaam in." with a user icon and a copy/cut/paste icon.
- Wachtwoord:** Input field placeholder: "Voer uw accountwachtwoord in." with a lock icon and a copy/cut/paste icon.
- Aanmelden:** Blue rectangular button.
- Wachtwoord opnieuw instellen:** Red rectangular button.

Right Screenshot (After Reset):

- Gebruikersnaam:** Input field placeholder: "Voer uw gebruikersnaam in." with a user icon and a copy/cut/paste icon.
- Wachtwoord opnieuw instellen:** Large blue rectangular button.
- Annuleren:** Small grey rectangular button.

loginpagina: wachtwoord wijzigen (2/4)

The image consists of two side-by-side screenshots of a web interface for changing a password. Both screenshots feature the orange 'cPanel' logo at the top.

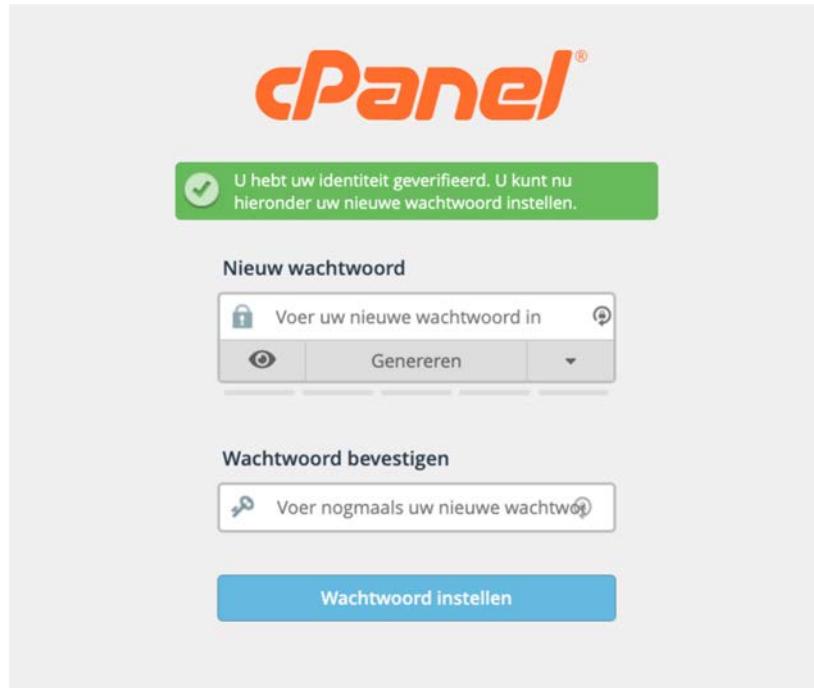

Left Screenshot (Step 1):

- Text:** "Voer uw contacte-mailadres hieronder in om uw beveiligingscode te ontvangen."
- Input Field:** "Contacte-mailadres" followed by a text input field containing "Hint:".
- Button:** "Beveiligingscode verzenden"
- Link:** "Annuleren"

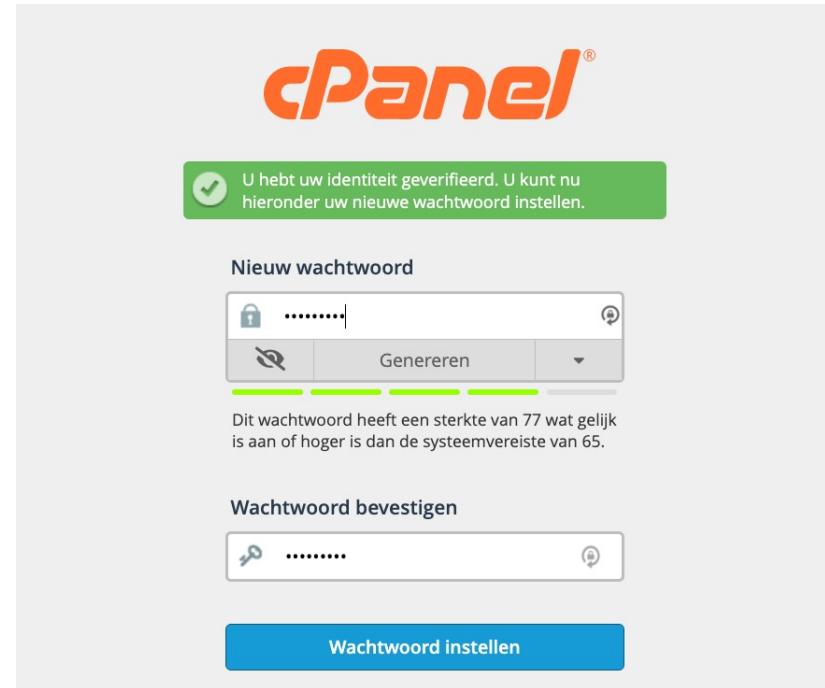

Right Screenshot (Step 2):

- Text:** "De beveiligingscode is naar het contacte-mailadres van de account verstuurd. Voer de beveiligingscode hieronder in om het opnieuw instellen van het wachtwoord te voltooien. Als u geen contacte-mailadres hebt ingesteld of geen toegang hebt tot dit e-mailadres, kunt u niet doorgaan."
- Input Field:** "Beveiligingscode" (empty).
- Text:** "Beveiligingscode opnieuw verzenden (?)"
- Text:** "Houd dit browservenster open.
U moet de code in dezelfde browser invoeren
als waarmee u het verzoek heeft gedaan om
het wachtwoord opnieuw in te stellen."
- Button:** "Verzenden"
- Link:** "Annuleren"

loginpagina: wachtwoord wijzigen (3/4)

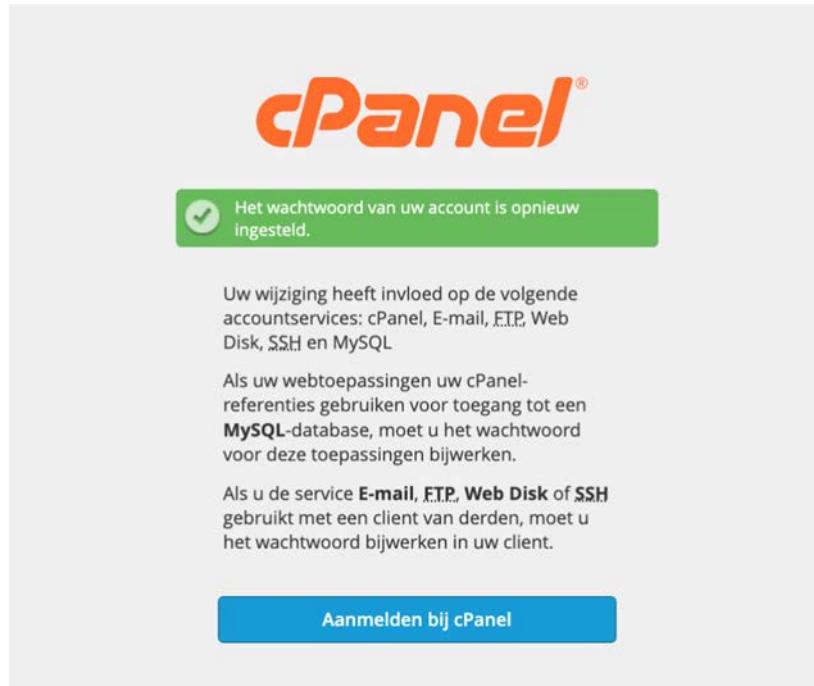

The screenshot shows the third step of a password change process on a cPanel login page. At the top, the cPanel logo is displayed. A green success message box contains the text: "U hebt uw identiteit geverifieerd. U kunt nu hieronder uw nieuwe wachtwoord instellen." Below this, a section titled "Nieuw wachtwoord" contains a password input field with a lock icon and placeholder text "Voer uw nieuwe wachtwoord in". To the left of the input field is an "Eye" icon for password visibility and a "Genereren" button. To the right is a copy icon. Below the input field is a "Wachtwoord bevestigen" section with a password input field containing "....." and a copy icon. To the left is a key icon and a placeholder text "Voer nogmaals uw nieuwe wachtwoord in". At the bottom is a large blue "Wachtwoord instellen" button.

This screenshot shows the same password change process as the first one, but with a visual feedback element. A green progress bar at the bottom of the "Nieuw wachtwoord" section is partially filled with green, indicating the password's strength. Above the progress bar, a message states: "Dit wachtwoord heeft een sterkte van 77 wat gelijk is aan of hoger is dan de systeemvereiste van 65." The rest of the interface is identical to the first screenshot, including the cPanel logo, verification message, and "Wachtwoord instellen" button.

loginpagina: wachtwoord wijzigen (4/4)

The screenshot shows the cPanel logo at the top. A red error message box displays the text: "Uw sessiecookie is ongeldig. Meld u opnieuw aan." (Your session cookie is invalid. Log in again.). Below the error message is the standard cPanel login form. It consists of two input fields: "Gebruikersnaam" (Username) and "Wachtwoord" (Password), each with a placeholder text "Voer uw gebruikersnaam in." and "Voer uw accountwachtwoord in." respectively. To the right of the password field is a small icon showing a user profile with the number "1". At the bottom of the form is a large blue "Aanmelden" (Log in) button. Below the button, there is a link "Wachtwoord opnieuw instellen" (Reset password).

AP-mail met info

Your password has changed.

You have successfully updated your password for the following services:

- ftp
- mail
- MySQL
- system

If you initiated this change, disregard this email. If you did not initiate this change, contact your system administrator.

subdomein aanmaken
met naam van vak

cpanel > subdomein aanmaken

- Een **subdomein** is een extra functie in DNS, en een onderverdeling van een bestaande domeinnaam.
- Een subdomein wordt gecreëerd door een **nieuwe map** aan te maken op uw webruimte. Deze map bevat een indexbestand (**index.html**) die wordt weergegeven als naar het subdomein gegaan wordt. Er kunnen een onbeperkt aantal subdomeinen aangemaakt worden.

cpanel > subdomein aanmaken (1/4)

The screenshot shows the cPanel interface with three main sections: DOMAINS, METRICS, and SECURITY.

DOMAINS

- Site Publisher
- .com Domains
- Addon Domains
- Subdomains** (highlighted with a red oval)
- Aliases

METRICS

- Visitors
- Errors
- Bandwidth
- Raw Access
- Awstats

- Analog Stats
- Webalizer
- Metrics Editor

SECURITY

- SSH Access
- IP Blocker
- SSL/TLS
- Manage API Tokens
- Hotlink Protection

- Leech Protection
- SSL/TLS Status
- Two-Factor Authentication

subdomein aanmaken (2/4)

The screenshot shows the 'Subdomains' section of the cPanel interface. On the left, there's a sidebar with icons for Home, Subdomains, Domains, SSL/TLS, Advanced, and Logout. The main area has a heading 'Create a Subdomain'. A red circle highlights the 'Subdomain' input field, which contains 'webtechnologie'. Below it is a 'Domain' dropdown set to '.gpro.apstudent.be'. Under 'Document Root', there are two options: '/public_html/' and 'webtechnologie', with the latter being the selected one. A 'Create' button is at the bottom. To the right of this form, a large red text block reads: 'Voeg een map toe aan de root van uw webruimte: een map met de naam van het vak, bijvoorbeeld "webtechnologie".'

Voeg een map toe aan de root van uw webruimte:
een map met de naam van het vak,
bijvoorbeeld "webtechnologie".

subdomein aanmaken (3/4)

The screenshot shows the cPanel interface for managing subdomains. In the top navigation bar, there is a search bar with the placeholder "Search (/)" and several user icons. Below the header, the "Subdomains" section is selected, indicated by a blue icon with the word "sub.". A green success message box displays the text: "Success: 'webtechnologie' .gpro.apstudent.be has been created." At the bottom left of the main content area, there is a "Go Back" link.

subdomein aanmaken (4/4)

cPanel

Subdomains

A subdomain is a subsection of your website that can exist as a new website without a new domain name. Use subdomains to create memorable URLs for different content areas of your site. For example, you can create a subdomain for your blog that is accessible through [blog.example.com](#) and [www.example.com/blog](#)

file manager

cpanel > file manager

- In de **file manager** kunnen alle bestanden binnen een webserver teruggevonden worden. Het is een applicatie om de bestanden op uw webruimte mee te beheren: uploaden, downloaden, hernoemen en verplaatsen van bestanden.
- In de map **public-html** staan de bestanden die voor iedereen beschikbaar zijn. Daar worden websites geplaatst.

cpanel > file manager

The screenshot shows the main dashboard of the cPanel control panel. It is organized into three main sections: FILES, DATABASES, and DOMAINS.

- FILES:** Contains icons for File Manager, Images, Directory Privacy, Disk Usage, Web Disk, Backup, Backup Wizard, and Git™ Version Control. The "File Manager" icon is highlighted with a red circle.
- DATABASES:** Contains icons for phpMyAdmin, MySQL® Databases, MySQL® Database Wizard, and Remote MySQL®.
- DOMAINS:** Contains icons for Site Publisher, Domains, Addon Domains, Subdomains, Aliases, Redirects, Zone Editor, and Dynamic DNS.

cpanel > file manager (public html > vak > new file)

The screenshot shows the cPanel File Manager interface. On the left, there's a sidebar with navigation links like Home, Up One Level, Back, Forward, Reload, Select All, Unselect All, View Trash, and Empty Trash. The main area shows a tree view of the directory structure under /home/. A red circle highlights the '+ File' button in the top-left corner of the toolbar. Another red circle highlights the 'New File' button in the modal window.

cpanel > file manager (public_html > vak > new file > index.html)

The screenshot shows the cPanel File Manager interface. On the left, the file tree displays the directory structure under /public_html/webtechnologie. A red circle highlights the 'webtechnologie' folder. In the center, a list of files and folders is shown, including various error pages (400.shtml, 401.shtml, etc.) and a 'cp_errordocument.shtml' file. On the right, a detailed table provides information about each item. A modal window titled 'New File' is open in the foreground, prompting the user to enter a new file name. The input field contains 'index.html', which is also circled in red. Below the input field, it says '(ex: file.txt, file.html, file.php)'. The 'New file will be created in:' dropdown shows the path '/public_html/webtechnologie'. At the bottom of the modal are 'Create New File' and 'Cancel' buttons.

cpanel > file manager

The screenshot shows the cPanel File Manager interface. At the top, there's a navigation bar with a search bar and a settings icon. Below it is a toolbar with various file operations: File, Folder (highlighted with a red circle), Copy, Move, Upload, Download, Delete, Restore, Rename, Edit, HTML Editor, Permissions, View, and Extract. A Compress option is also present. On the left, a sidebar shows a tree view of the directory structure under /home/. The main area displays a list of files and folders in the /public_html/webtechnologie directory. A modal window titled "New Folder" is open in the center, prompting for a new folder name. The input field contains "oefeningen". Below the input field, it says "New Folder will be created in:" followed by the path "/public_html/webtechnologie". At the bottom of the modal are "Create New Folder" and "Cancel" buttons.

New File Name: **oefening01.html**

(ex: file.txt, file.html, file.php)

New file will be created in: **/public_html/webtechnologie/oefeningen**

Create New File **Cancel**

The screenshot shows the cPanel File Manager interface. On the left, there's a sidebar with a tree view of the directory structure under /home/. The 'oefeningen' folder in the 'webtechnologie' directory is highlighted with a red oval. At the top, there's a toolbar with various file operations like Upload, Download, Delete, and Rename. Below the toolbar is a search bar and a 'Go' button. A 'New File' dialog box is open in the center, prompting for a file name ('oefening01.html') and a destination path ('/public_html/webtechnologie/oefeningen'). The 'Create New File' button is visible at the bottom of the dialog. The main area shows a message 'This directory is empty.'

cpanel > file manager

The screenshot shows the cPanel File Manager interface. The left sidebar displays a tree view of the directory structure under `/home/public_html/webtechnologie`. The visible branches include `etc`, `logs`, `mail`, `public_ftp`, `public_html` (which contains `cgi-bin`), `webtechnologie` (which contains `cgi-bin` and `oefeningen`), `ssl`, and `tmp`. The right panel shows a list of files in the `oefeningen` folder. The list includes one file, `oefening01.html`, with the following details:

Name	Size	Last Modified	Type	Permissions
<code>oefening01.html</code>	0 bytes	Today, 12:49 PM	text/html	0644

At the top of the right panel, there are various navigation and management buttons: File Manager, Search, Go, Settings, File, Folder, Copy, Move, Upload, Download, Delete, Restore, Rename, Edit, HTML Editor, Permissions, View, Extract, Compress, Home, Up One Level, Back, Forward, Reload, Select All, Unselect All, View Trash, and Empty Trash.

cpanel > file manager

The screenshot shows the cPanel File Manager interface. On the left, there's a sidebar with a tree view of the directory structure under /home/. The current path is public_html/webtechnologie. A file named 'oefening01.html' is selected, and a context menu is open over it. The menu items are: Download, View, Edit (which is highlighted with a blue background), HTML Edit, Move, Copy, Rename, Change Permissions, Delete, and Compress.

cpanel > file manager

The screenshot shows a split-screen interface for editing files in cPanel's file manager. On the left, the code editor displays an HTML file with the following content:

```
1  <!DOCTYPE html>
2  <html lang="nl-BE">
3  <head>
4      <meta charset="UTF-8">
5      <meta http-equiv="X-UA-Compatible" content="IE=edge">

8  </head>
9  <body>
10     Hello AP!
11  </body>
12  </html>
```

The line "Hello AP!" is highlighted with a light gray background. At the top of the editor, the path "Editing: /home/" is shown, with "/public_ht" being the active tab. The encoding is set to "utf-8". On the right side, the preview window shows the rendered HTML output: "Hello AP!".

cpanel > file manager

The screenshot shows the cPanel File Manager interface. On the left, there's a sidebar with a tree view of the directory structure under the path `/home/username/public_html/webtechnologie`. The main area displays a list of files and folders. One file, `oefening01.html`, is selected. A modal dialog box titled "Rename" is open over the list, with the "Old file name" field containing `/public_html/webtechnologie/oefeningen/oefening01/oefening01.html` and the "New file name" field containing `index.html`. Both the "Rename" button and the "index.html" input field are circled in red.

Name	Size	Last Modified	Type	Permissions
oefening01.html	312 bytes	Today, 12:53 PM	text/html	0644

cpanel > file manager

The screenshot shows the cPanel File Manager interface. On the left, there's a sidebar with a tree view of the directory structure under /home/public_html/webtechnologie. The main area shows a list of files with columns for Name, Size, Last Modified, Type, and Permissions. One file, index.html, is selected. A modal dialog box titled "Copy" is open in the center, prompting the user to enter a file path to copy the selected file to. The current file path is shown as /public_html/webtechnologie/oefeningen/oefening01/index.html, and the target path is /public_html/webtechnologie/oefeningen/oefening01.

Name	Size	Last Modified	Type	Permissions
